Total Project Cost: \$213,426,000

Completion Date: 2000

Project Overview:

LiRo is providing resident
engineering inspection and CPM
scheduling services for the Cedar
Creek Plant. (Nassau County
DPW, \$213M, 2000)

Cedar Creek WPCP - CPM Scheduling and Resident Engineering Inspection Services

Wantagh, NY

The Cedar Creek Water Pollution Control Plant (WPCP) handles approximately 70 MGD of wastewater generated from the southwestern quadrant of Nassau County.

The County has approved over \$200M in improvements to the Cedar Creek WPCP. LiRo is providing resident engineering inspection and CPM scheduling services for these improvements which include:

- Digester rehabilitation
- Mechanical/electrical improvements
- Laboratory improvements
- RAS pump station
- Engine generators
- Secondary settling tanks

Maintenance of plant operations (MOPO) during construction was critical during the various capital improvements.
